Fee Proposal for Theatre Concessions and Alcohol Sales 2022

Concessions (food and snacks) pricing will be marked up by the theatre manager after considering total cost by a factor of 300 to 700%. Concession items will be removed and or replaced from the menu if not selling. Our cost of goods will sometimes change in the middle of the season. Any price increase necessitated by the change of wholesale cost will follow the same formula to determine the price we offer to the public. Any replacement items will likewise follow the same formula.

Beer, Wine, and Liquor will be marked up by the theatre manager after considering total cost by a factor of 400 to 800%. Any price adjustments caused by what we pay will be calculated using the original formula. Theatre Manager will make every effort to maintain consistent pricing throughout the season. Pricing will only fluctuate if our costs raise significantly.
